A small launch, ready to share

An example handoff document made with LoveMarkDown.

The plan

Keep the editable Markdown source. Share a rendered copy with the people who need the result.

Deliverable	Format	Why it helps
Working notes	Markdown	Easy to keep editing
Review copy	PDF	Read and search the text
Quick visual	PNG	Share a snapshot of the document

Before sharing

- Write a clear heading
- Check the table in Preview
- Save the Markdown source
- Open the exported copy and review it

> The source stays a local file. Export creates a separate copy.

A short example

```text
Open a file -> Write -> Preview -> Save -> Export
```

This is demonstration content, not a customer project.
